## Sunset Pool Sand and Water Play Area

Geneva Park District

### **Playing in the sand and water.**

The Geneva Park District works hard to keep the Sunset Pool fresh and fun for the community.

Upland Design was hired to revitalize the 20-year old sand play area. Design goals were to create an entirely new sand area, replacing the out-dated sand area, while incorporating water play and also improving the accessibility of the site.

Many fun concepts were created, but the staff were most excited about the concept featuring a pirate themed boat with dragon and palm trees. A large shade shelter keeps the main structure out of the sun's rays. This oasis of fun has been a source of play and summer time adventure for many kids. With rubber surfacing, sand play areas and a water feature, this was just the fresh and fun makeover needed at Sunset Pool.
