Prairie Trail Park - Sports

Bolingbrook Park District, Bolingbrook, Illinois

Playing in the neighborhood.

Prairie Trails Park was created for the new neighborhoods on Bolingbrook's southern edge. It is a community park that contains both passive and active recreation.

Upland Design was engaged to prepare Phase II construction plans and assist with construction observation. Sport courts include two regulation tennis courts with an asphalt base, color coat system and full fencing with a nearby trio of half basketball courts set in a circle. On any given day, the community is out recreating in this well used park that also receives visitors from a nearby school.
