Simmons Park – Ball Diamond Renovations

Fox Valley Park District Aurora, Illinois

Play ball!

As part of an Illinois Department of Natural Resources OSLAD grant, the two ball fields at Simmons Park got a complete renovation. The goals included bringing the fields up to current accessibility standards, addressing drainage problems, installing new backstops and fencing, renovating players areas and adding foul poles. Each item was addressed and the two fields made new again for community enjoyment.

To complete the park renovation, a new permeable paving parking lot was installed along with picnic shelter, playground, restroom building and rain garden.
